

Classnet Twist Audio

Interactive control in the computer classroom Demonstrate, Monitor, Interact

Classnet is a fully integrated interactive control system for IT classrooms and training rooms that facilitates highly focused training sessions with greatly improved information retention and reduced stress for both the instructor and student.

With a few keystrokes from the easy to use control panel you can:

Demonstrate:

Project your screen to any or every student screen.
Project a student screen to another student or the entire class.

Monitor:

View any single student's screen, monitor their progress as they learn by doing.
Scan the entire classroom.

Interact:

Control any student's computer from your computer.
Correct an error on a student's computer, let the class view the correction on their screens.

Focus Attention:

Blank student's screens, lock keyboard and mice to gain attention.

Communicate:

Communicate with individual students discreetly through their headsets.
Interface with projector, interactive board or multimedia sources.

Interactive Control in the Computer Classroom

Classnet Twist Audio

Demonstrate, Focus, Interact Intuitive, easy to use

How it works:

Classnet functions completely independent of networks or operating systems, it will operate with any operating system and alongside the existing network, unlike software solutions it is totally secure and will have no impact on the performance of the network.

Classnet operates in real-time and is not affected by the performance of the network.

Classnet connects the computers in the classroom in a daisy chain loop configuration (up to a maximum of 64 computers) using CAT5 FTP cable, systems up to 12 computers have a maximum cable length of 110M, systems over 12 computers require a Multiloop Unit, this increases the maximum cable length to 300M.

Stereo Audio

The Stereo Audio feature enables teachers to discreetly help individual students without disrupting the entire class; directly address the entire class without outside interference; broadcast audio presentations to the entire class, and transform their classroom into a complete multimedia centre.

Classnet Teacher Control Panel

With a few keystrokes from the easy to use Control Panel you can:

- Demonstrate
- Monitor
- Interact
- Focus Attention

Specifications

System

Max. No. of students 64 (Multiloop required for groups of more than 15 students)

System Cable	2 X CAT5 FTP cable
Maximum Distance	110m/360ft without Multiloop, 5 X 60m/200ft each loopwith Multiloop
Platforms	IBM Compatible, PS/2
Mouse Support	PS/2, Wheelmouse
Operating Systems	DOS, Windows (3x, 9x, 2000, NT,ME, XP) Linux, UNIX, HP UNIX, QNX,SGL, FreeBSD, BeOS, Open VMS
Resolution	Up to 1680X1280 @ 75Hz
Warranty	3 Years
Operating Temp	0°C to 40°C
Storage Temp	- 40°C to 70°C

	Teacher unit	Student unit
Cables	CPU – 3 In 1	CPU – 3 In 1
Dimensions	225.0 x 233.0 x 30.5 mm	223.0 x 152.0 x 43.0 mm
Weight	1.030 KG / 2.27 pounds	1.030 KG / 2.27 pounds
Shipping Weight	2.100 KG / 4.63 pounds	2.00 KG / 4.41 pounds
Power Consumption	External Power Adapter 6VDC	External Power Adapter 6VDC
